

COMPARE THE PAIR

In the Venn Diagram, write the similarities between the two elements you have been given in the overlapping section of the two circles. Write the differences in the sections that do not overlap, relevant to each element. The research questions below should help get you started:

What do the elements look like? What are their physical properties? How and when were the elements discovered? What are some of the common uses for the elements?

Element #1: _____

Element #2: _____
